

## SHOWER HARDWARE

# SLIDING SHOWER SYSTEM

Functional and elegant with a smooth sliding operation, the Sliding Shower System offers flexibility in configuration options and space-saving features.

The minimal profile of the hardware complements the frameless appearance of the shower giving the impression of space and openness.

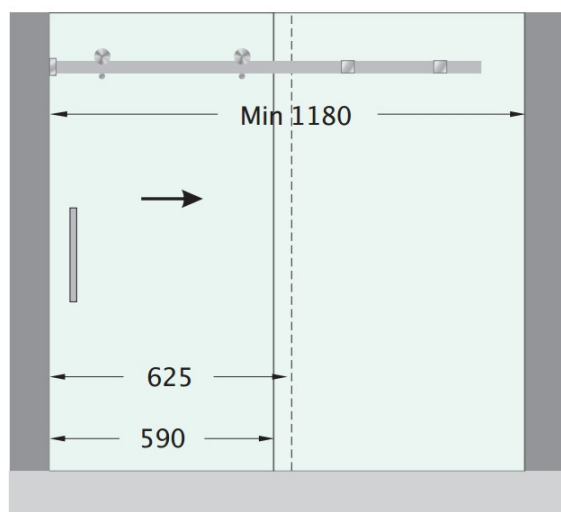

Toughened Safety Glass and an anti-jump mechanism provide safe features for the family and prevents the door from derailing.

Allows ease of access and removes the intrusion created by a pivot door.
